

SUMMARY

Software Engineer experienced in building scalable backend systems and distributed services using Go and Node.js. Strong foundation in data structures, algorithms, and system design with hands-on experience in microservices, API gateways, and cloud deployment on AWS. Proven ability to optimize performance, reduce latency, and deliver production-ready systems in fast-paced, ambiguous environments.

CORE COMPETENCIES

- Data Structures & Algorithms (Arrays, Hashing, Trees, Graphs)
- Object-Oriented Design & System Design
- Distributed Systems & Scalability
- Problem Solving & Complexity Analysis
- Regularly practice algorithmic problem solving on platforms like LeetCode and GeeksforGeeks.

TECHNICAL SKILLS

Languages: Go (Golang), JavaScript, Python, SQL, Java

Backend: RESTful APIs, HTTP Gateways, Middleware, JWT Auth, Sliding-Window Rate Limiting, Microservices, Stateless Architecture, TCP/IP, BLE networking

Databases: PostgreSQL, MongoDB, Redis — schema design, query optimization, CRUD, relational databases

DevOps & Cloud: Docker, AWS EC2, Linux/Unix, CI/CD, Horizontal Scaling

Security & IIoT: Sensor data ingestion pipelines, BLE device integration, JWT-secured APIs, idempotent writes, fault-tolerant reconnection, OpenAI API, OpenCV

Practices: DSA, OOP, System Design, Agile/Scrum, SDLC, Code Reviews, Technical Documentation, Algorithms & Complexity Analysis, Distributed Systems, algorithm design, Computer Science fundamentals

PRODUCTION EXPERIENCE

[IoT Air Quality Monitoring System](#) · Internship

Jan 2024 – June 2025

- Designed and implemented an event-driven sensor ingestion pipeline processing real-time device data, reducing database writes by **92%** and improving system efficiency under high-frequency inputs.
- Built fault-tolerant backend systems ensuring **idempotent processing and reliable data handling** in distributed environments.
- Collaborated across hardware, firmware, and backend teams to deliver an end-to-end scalable IIoT solution.

[Dr-LaBike](#) · Freelance Client

Aug 2024 – Dec 2024

- Developed and deployed a scalable backend system serving **1000+ monthly bookings and 200+ users**, improving operational efficiency for rural healthcare services.
- Designed optimized database schemas and queries, reducing response time and improving data retrieval performance.
- Implemented secure authentication and middleware architecture to handle concurrent requests reliably.

TECHNICAL PROJECTS

[Stateless Auth & Rate-Limited API Service](#) · Go · Redis · PostgreSQL · Docker · AWS EC2 · JWT

Oct 2025 – Feb 2026

- Designed and built a **stateless distributed API gateway** with JWT authentication and Redis-based rate limiting, improving throughput by **20%** and reducing latency by ~15–20ms under concurrent load.
- Architected horizontally scalable microservices by decoupling session and persistent storage using Redis and PostgreSQL.
- Deployed containerized services on AWS EC2 with CI/CD pipelines, ensuring consistent production environments.

[Applicant Tracking System Platform \(ATS\)](#) · Node.js · OpenAI API · MongoDB · Docker · JWT · MERN Stack

Jun 2025 – Sep 2025

- Built a scalable backend system for resume analysis with REST APIs and MongoDB, supporting concurrent users and asynchronous processing.
- Integrated external AI services to process and evaluate user inputs, enabling automated decision-making workflows.
- Designed system architecture to handle duplicate requests and ensure consistency in distributed processing.

[NIDAR Drone Navigation](#) · Python · OpenCV · Docker · GPS

Aug 2025 – Jan 2026

- Designed a real-time navigation pipeline integrating GPS and computer vision for autonomous mission execution under strict time constraints.
- Led a cross-functional team of 4 engineers, delivering a fully functional system and securing **₹4.5L funding**.
- Achieved **Top 20 rank among 500+ teams**, demonstrating strong problem-solving and system integration skills.

CERTIFICATIONS

Certification: AI for Engineers — Indian Institutes of Technology, Kanpur (Cert: 2061206647820)

Certification: NIDAR Drone Federation — Autonomous Systems & IIoT Hardware-Software Integration

EDUCATION

Master of Computer Applications (MCA) - Presidency University, Bengaluru

Graduating in July 2026

Bachelor of Computer Applications (BCA) - Integral University, Lucknow

Oct 2024
